-

Work Experience

None

Projects

WEATHER APPLICATION

August 2024

- Provided live weather information with dynamic backgrounds based on current conditions for an engaging user experience
- Enabled users to search for cities and view detailed weather data, including temperature, humidity, and wind speed
- Designed a clean and intuitive layout for easy navigation and quick access to weather information

TEXT TO SPEECH CONVERTER

July 2024

- Transformed written text into natural-sounding speech in real-time, supporting multiple voices
- Designed a simple and intuitive layout for easy text input and immediate audio output

CODE PLAYER

July 2024

- Allowed users to write and run HTML, CSS, and JavaScript code with immediate live preview
 - Featured a dual-page layout with code on one side and the live output on the other for easy comparison
 - Provided an engaging platform for experimenting with code snippets and learning web development basics
-

Certificates

FreeCodeCamp | Responsive Web Design

August 2024

- Gained expertise in creating flexible and adaptive web designs using CSS media queries, Flexbox, and CSS Grid to ensure optimal viewing across various devices
- Completed real-world projects demonstrating the ability to design and implement responsive layouts that enhance user experience on different screen sizes and devices
