PROFILE

Hello! I'm Nabeel, a full-stack web developer skilled in HTML, CSS, JS, Bootstrap, Django, and SQL databases. I build responsive, dynamic, and user-friendly websites from front-end design to back-end functionality. Whether you need a sleek interface, robust admin features, or efficient data management, I'm here to turn your ideas into fully functional web solutions.

PROJECTS

MTJ Clone - Full Stack   MAY 2025
Bootstrap, Django, PostgreSQL

- Fully responsive website for a seamless experience across all devices.
- Robust backend with admin and customer panels for efficient store management.
